WiFi X LR Long Range Wireless

Up to 750m (line of sight) wireless connection between laptop and ICU/imager has been achieved in the field between the WiFi X LR unit and the ICU integrated wireless.

Dual WiFi X LR High Power Wireless

Standalone or on a robot, two high power wireless WiFi X LR units facilitate wireless connection of up to 1500m (line of sight).

RayzorXPro Protective Cover

Lighter and improved cover for outside use, as well as convenient placement of external shielding when working with high energy levels.

Tripod Mount

For placement of the **RazyorX/RazyorXPro** digital panel on a tripod. Compatible with any standard tripod.

External Reels

Various external reel options enable increased distance between the laptop and the ICU, pushing power down the line for unlimited working time; up to 200m with Smart X 150.

Additional Capabilities

- Carrying case also serves as a working platform
- Robot ready imager as a standard
- Tripod mountable*
- Built in database
- External camera for color images and live video
- Enhanced professional software for advanced users
- one system compatible with 5 interchangeable imagers (CCD and a-Si)

*note: tripod not provided

Vidisco Accessories & Capabilities

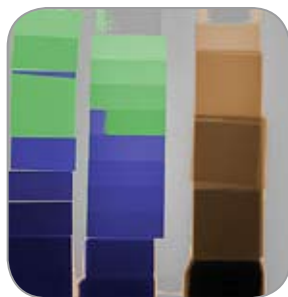

There is More to a DR System

XR-DE Organic Detection with Pulsed X-ray Sources

Truly portable and revolutionary, the XR-DE module allows you to create Dual Energy (DE) X-ray images with a Golden Engineering pulsed X-ray source. The process is fully automated and allows you to see different hues of **Orange** for organic materials, whereas soft inorganic materials (such as glass) appear in hues of **Green**; and strong inorganic materials (such as metals) are colored in shades of **Blue**. Vidisco offers the most advanced and detailed Dual Energy images in the market, another excellent tool for X-ray inspection.

- Only Dual Energy solution compatible with Golden Engineering pulsed XR200/XRS-3
- Fully automatic organic detection
- Battery free module
- Small and light
- Easy to install - No screws, no assembly – Just snap it on!
- Same high penetration maintained when taking standard X-ray shots
- Probe Function: “peels off” external layer to reveal organic/inorganic materials inside

WiFi X Digital Wireless USB Module

Fast, reliable wireless data transfer. Up to 200 m (line of sight) laptop to ICU/imager consistent wireless connection. Light and battery free, it is easily connected via a USB port.

WXR Wireless X-ray

Compact, battery free wireless X-ray. Simple and convenient setup. Compatible with all Golden X-ray sources (XR-150, XR-200, XRS-3)
